

Founded in 1988, ICSA is the global organization of securities industry associations representing firms across the world including East and West Asia, Latin America, North America, and Europe.

ICSA is the only true representative of the global securities industry.

ICSA provides members with market intelligence, a stronger voice, and increased impact by

- serving as a forum to understand developments, exchange views and practices, and collaborate to work for better global capital markets
- advocating appropriate regulatory policies, regulations, and initiatives across jurisdictions to promote efficient and well-functioning securities markets and the flow of cross-border capital
- assisting regulators and government authorities in understanding the global, consolidated, and non-biased position of the industry as it relates to proposed policy and regulatory reform

As IOSCO brings together the world's securities regulators and develops and implements internationally recognized standards for securities regulation, ICSA is ideally suited to work closely with them to provide market perspectives and positions. ICSA has built relationships with the Financial Stability Board, the Basel Committee on Banking Supervision, and the OECD.

Please find in the annex a recent essay by our Chairman, the list of members, and contact information.

Consultation responses and research published by ICSA can be found on dedicated sections of our website www.icsa.global.

Also in the annex are past programs of ICSA annual meetings, which members have always found highly valuable and rewarding.

MEMBER TESTIMONIALS

“ICSA membership is now essential to being able to serve our member firms, as global regulatory standards are increasingly setting the framework for our domestic regulation.”

“It is vital that we both understand and have some capacity to influence market standards on a global basis.”

“It is invaluable to discuss with other members around the world how they have approached and implemented new market standards and regulations.”

“One of my members contacted us with technical compliance questions about another region. I contacted the relevant ICSA member who engaged the experts within his association. They didn’t know the answers straight away – the questions were far from straight forward - but very kindly went away and investigated and came back with a very comprehensive response. Our member firm was delighted.”

“Through collective effort through ICSA, we can better explain to regional and national decision makers how potential changes effect other countries, and the global economy...”

“With the sharp political and regulatory response to the Global Financial Crisis, ICSA has never been more important as a means for its member organisations to share information on market developments and regulatory actions, engage in a joint industry dialogue with global standard setting bodies (like IOSCO), and press for government policies to recognise the critical dependence of economic growth on effective financial markets.”

CONTACT INFORMATION

ICSA's Secretariat is located in London.

The Secretariat is involved in a number of key areas, including: liaison and cooperation with members; new membership; budgets and the allocation of resources; organization of Annual General Meetings and other meetings; and coordination of Working Groups.

ANNEX I

The International Council of Securities Associations (ICSA) Contribution to Global Capital Markets

David Lynch, Chairman 2019-21

In response to the rapid globalization of finance, the International Council of Securities Associations (ICSA) was established in 1988 by securities associations from Asia, North America, and Europe to provide a forum to develop common regulatory positions to promote more integrated capital markets. Members also exchange views on market intelligence and industry best practices.

Over time, the International Organization of Securities Commissions (IOSCO) has played an increasingly important role in providing policy direction to independent jurisdictions in areas such as investor protection, transparency, derivatives and commodities, clearing, market conduct, and cybersecurity. ICSA has engaged actively with IOSCO – based in Madrid - to provide an industry perspective on policy positions and the direction of future proposals. ICSA has also worked in cooperation with the Basel Committee on Banking Supervision and the OECD.

The ICSA role as interlocutor for the global securities industry expanded dramatically in the years following the 2008 financial crisis. The G20 directions for reform, beginning in 2009, and the formation of the Financial Stability Board, set the direction and stepped up the tempo of regulatory reform, notably in OTC derivatives markets following the seize-up in short-term repo and securities lending markets, the collapse in the asset-backed securities markets, the lack of adequate disclosure of derivative products and absence of centralized clearing and settlement. The G20 and FSB also focused on measures to mitigate systemic risks in the banking and shadow banking systems.

ICSA coordinated discussion and developed a consensus view among member firms on the trading and clearing reforms on OTC derivative reform in Europe and the United States. ICSA was one of the first global organizations to urge greater cooperation and coordination in rule-making across jurisdictions to mitigate blockages in cross-border transactions from conflicting and

duplicative regulation. Once it became evident these regulations related to trading and clearing in OTC markets were evolving in a disjointed manner and contributing to market fragmentation, ICSA endorsed remedial solutions such as regulatory recognition and jurisdictional deference, substituted compliance and passporting, as solutions to lower regulatory barriers and lower costs.

As a priority initiative, ICSA assisted in the formation of and provided the Secretariat for a global financial consultation group - the Cross-Border Regulation Forum (CBRF) - in response to the IOSCO decision to strike a Task Force on Cross Border Regulation. The CBRF published two papers, one in mid-2014 setting out a fundamental position on cross-border reform and a second in early 2015 in response to a formal IOSCO consultation paper. IOSCO recognised the value of ICSA's practical inputs which contributed to their final recommendations.

Recently, ICSA has responded to consultations on liquidity, conduct, and implementation of regulations. ICSA has provided authorities and regulators with valuable insights by surveying its global membership on topics such as culture and conduct, cybersecurity, transparency, and MiFID II implementation.

ICSA's Emerging Markets Committee has had much success on a number of fronts, such as setting out a framework for building functional credit markets, developing derivatives markets, and analysing the process of regulatory impact assessment in emerging countries. Each year the EMC publishes a research report, with last year's topic being Investor Protection. In 2019, the EMC will perform a comparative analysis of data in securities markets.

To maintain high levels of engagement, ICSA has instituted a program of bi-annual meetings with both IOSCO and the FSB.

ICSA organizes bi-lateral meetings with Standing Committee Chairs at the IOSCO annual conference. Topics addressed at Budapest 2018 included retail OTC leveraged products, conflicts of interest in capital raising, mechanisms for managing extreme volatility, fund leverage, ETFs, outsourcing, Fintech, AI, and post-trade services. Sydney 2019 promises to be equally important, with the theme of the public forum titled "Other People's Money".

ICSA members are greatly anticipating the 2019 AGM & Conference in Milan June, where members will interact with regulators and government officials on issues including ESG finance, Financial Education, Brexit, and European Banking and Capital Markets Union.

The 2019 Japan G20 chair placed the issue of market fragmentation high on its agenda. IOSCO is now re-visiting the work of its Cross-Border Regulation Task Force. ICSA believes that harmful fragmentation increases risks to orderly markets, raises investor protection concerns, and can lead to systemic risk. ICSA will firmly make the case that global standard-setting bodies have a role to play in ensuring greater consistency in rules implementation, and in achieving an effective substituted compliance framework.
