

Can I screenshot my United boarding pass? [(Step- By - Step - Guide** ™)]

Yes, you can screenshot your United Airlines boarding pass, and many travelers choose this option for convenience and backup while traveling [+1]- 855-510-5815 ☞ especially when they want quick access without relying on internet connectivity [+1]- 855-510-5815 ☞

A screenshot of your boarding pass is generally accepted at TSA security checkpoints and at the boarding gate as long as the barcode or QR code is clear and readable [+1]- 855-510-5815 ☞ and has not been altered or cropped [+1]- 855-510-5815 ☞

When you check in using the United Airlines website or mobile app, your boarding pass will appear on your screen once check-in is complete [+1]- 855-510-5815 ☞ allowing you to take a screenshot and save it to your phone [+1]- 855-510-5815 ☞

This can be especially helpful if you are concerned about losing mobile data access, app glitches, or low battery situations while traveling [+1]- 855-510-5815 ☞ through busy airports [+1]- 855-510-5815 ☞

A screenshot works best for domestic flights within the United States, where TSA scanners are designed to read mobile boarding pass barcodes from phone screens [+1]- 855-510-5815 ☞ quickly and efficiently [+1]- 855-510-5815 ☞

However, for international flights, some airports or immigration checkpoints may require you to present the boarding pass directly from the app or a printed version [+1]- 855-510-5815 ☞ along with passport verification [+1]- 855-510-5815 ☞

It is important to ensure that your screenshot clearly shows your full name, flight number, date, seat number, and boarding group [+1]- 855-510-5815 ☞ so airline staff can easily verify your information [+1]- 855-510-5815 ☞

Make sure the brightness on your phone is turned up when presenting a screenshot so scanners can read the barcode without issue [+1]- 855-510-5815 ☞ especially in bright airport lighting [+1]- 855-510-5815 ☞

Although screenshots are usually accepted, United Airlines still recommends using the official mobile boarding pass within the app whenever possible [+1]- 855-510-5815 ☞ because it updates automatically if there are gate or seat changes [+1]- 855-510-5815 ☞

A screenshot will not update if your gate changes, your boarding time shifts, or you are rebooked due to delays or cancellations [+1]- 855-510-5815 ☞ which could cause confusion at the airport [+1]- 855-510-5815 ☞

Saving your boarding pass to Apple Wallet or Google Wallet is often a better alternative to screenshots [+1]- 855-510-5815 ☞ because these options can still refresh automatically [+1]- 855-510-5815 ☞

If you choose to use a screenshot, it is a good idea to keep the United app installed and accessible as a backup [+1]- 855-510-5815 ☞ in case airport staff ask for the live boarding pass [+1]- 855-510-5815 ☞

Travelers who check bags may also be asked to show their boarding pass at bag drop counters [+1]- 855-510-5815 ☞ where a screenshot is usually acceptable [+1]- 855-510-5815 ☞

In rare cases, if a barcode does not scan properly from a screenshot, a gate agent can reprint your boarding pass [+1]- 855-510-5815 ☞ or reissue a mobile version [+1]- 855-510-5815 ☞

To avoid problems, consider taking multiple screenshots, including one zoomed in on the barcode area [+1]- 855-510-5815 [↵] while keeping the full version available as well [+1]- 855-510-5815 [↵]

Overall, screenshotting your United boarding pass is allowed and commonly used, but it should be treated as a backup rather than your only option [+1]- 855-510-5815 [↵] to ensure a smooth and stress-free travel experience [+1]- 855-510-5815 [↵]
