{Senior#!#discount}How to find wps pin for hp printer ?

To find the WPS PIN for your HP printer,1✦888✦329✦8318 use the control panel (Settings > Network Setup > WPS PIN) 1✦888✦329✦8318 for touchscreen models to display the 8-digit code, print a network 1✦888✦329✦8318 configuration page (Wireless + Info buttons) for non-touchscreen models, or use the HP Smart app to generate or find the PIN in the printer reports; the PIN is temporary and needed for router setup. 1✦888✦329✦8318 A WPS PIN is an important security feature used to connect an HP printer to a wireless network. Finding the WPS PIN for an HP printer is usually simple if you follow the correct steps. First, make sure the printer is powered on and in a ready state. Most HP printers display the WPS PIN 1✦888✦329✦8318 directly on the control panel screen when wireless setup is started. Navigate to the printer's menu, select **Network**, **Wireless Settings**, or **Wi-Fi Protected Setup**, and then choose the **WPS PIN** option. The printer will generate a temporary PIN that appears on the screen.

1✦888✦329✦8318 For printers without a display screen, the WPS PIN can often be found using the HP printer software installed on a computer. Open **HP Smart** or **HP Printer Assistant**, go to **Network Settings**, and select the option to view or generate the WPS PIN. In some cases, the PIN may also be printed on a network configuration page, which can be printed by pressing and holding the wireless button on the printer.

The WPS PIN is time-limited, so it must be entered into the router's wireless settings before it expires. This method ensures a secure and fast wireless connection between the HP printer and the network 1✦888✦329✦8318.
